These include anamneses, diagnoses, therapy proposals and diagnostic findings, which us or other doctors/psychotherapists collect. Other attending doctors or psychotherapists might provide data as well (e.g. in doctor's letters).

In the course of your psychotherapy, diverse personal and therapeutic data will be collected, which will serve to maintain the treatment quality as well as contribute to our research activities. For this reason, questionnaires and diagnostic tests will collect scientific data at the beginning, through- out, at the end and six and twelve months after the end of your treatment. All data will be saved completely confidential.

The assessment and storage of your health data is an obligatory precondition for your treatment. Without this data and information, we are unable to offer you a thorough and competent treatment.

For the purpose of conducting video consultation hours, we cooperate with RED Medical Systems GmbH, 80687 Munich.

4. STORAGE OF YOUR DATA

We are legally obligated to save your personal data at least for 10 years after the completion of your treatment. Other provisions could account for longer retention periods, for example 30 years for documents in connection with interpreters or treatment expenses that are covered by the "Unfallkasse" (accident insurance).

Under particular circumstances, you have the right to have the data deleted, restrictedly processed or to make use of data portability.
